

The KRD /3 bagging weigher is the ideal weighing device for fast and precise filling of vegetable types such as potatoes, onions, and carrots, as well as for other loose bulk materials such as charcoal.

Via a food-safe conveyor belt with 3-row staggered flights, the product is gently transported into the weighing container until the desired target weight is exactly reached. A stepless speed reduction ensures highly precise fine dosing shortly before the target weight is reached.

The container is emptied electromechanically via the simple activation of a proximity switch. The filling material then passes through the filling hopper directly into the packaging container such as a pouch, sack, or net. Immediately after emptying, the system automatically starts the next weighing process.

The volume of the weighing container as well as the inlet and outlet sizes of the filling hopper can be adapted flexibly and customer-specifically to the respective requirements.

Special Features

- Electronic weighing device: With product memory and piece counter.
- Quick program change: Fast switching via a selector switch.
- Two performance sizes: KRD 250/3 (up to 12.5 kg) and KRD 300/3 (up to 25.0 kg).
- Automatic restart: Immediate restart after each emptying process.

Technical Data

- Drive power: 0.37 kW
- Power supply: 230 Volt AC
- Conveyor belt: Food-grade design with 3-row staggered transport flights.
- Fine dosing: Stepless speed reduction of the feed.
- Container emptying: Electromechanically controlled.
- Total weight: approx. 220 kg
